About This Content

The BR52 Wannentender Pack includes the tube-style 2'2' T30 BR52 tender in two versions, as it operated for the former DRG / DB and OeBB. Both versions are designed to couple to the BR52 steam locomotive as featured in earlier versions of Train Simulator and which is now available as part of the European Loco & Assets Pack.

Includes

- Tube-Style Tender T30 DRG/DB
- Tube-Style Tender T30 OeBB

Please note: the BR52 steam locomotive is not included in the BR52 Wannentender Pack

Hard Drive:6 GB HD space

Sound:Direct X 9.0c compatible

Other Requirements:Broadband Internet connection

Additional:Quicktime Player is required for playing the videos

English

Realistic tender for BR52. Looks impressive and modern. In my opinion better than the old one. Recommend to buy on sale for an extra low price.. This was the tender used by BR52 by default, so it is practically a must have.

This version is fully compatible with the version available though the 3rd party web site... and it is cheaper (and even more when on sale).

If you are into classic european steamers, get it now, as most BR52 freeware reskins require this tender anyway.

. I've got this addon long ago and if you have BR52, it's pretty much a must-have because it's the kind of tender this loco usually was and is seen with. But there's one thing that never stopped bothering me about it: The hand brake is always on in the tender and there is no way to release it. Clicking on it in the coupling&handbrake management bar doesn't do anything. The Loco still goes pretty well and doesn't lose too much steam or anything when it starts running, but it stalls easily. Is it normal, or is it a bug?. This was the tender used by BR52 by default, so it is practically a must have.
