Computer College, Department of Computer Science, Kingdom of Saudi Arabia

Data Structures (CS-214)

- ## INSTRUCTOR:
  Shahid Iqbal Lone
  e_mail: loneshahid@yahoo.com

- ## COURSE BOOK:

  1. Tanenbaum Aaron M. Langsam Yedidyah. Augenstein J Moshe, *Data Structures using C*.

- ## LIST OF REFERENCE MATERIAL:

  1. Seymour Lipschutz, *Theory and Problems of data Structures*, Schaum's Series, Tata McGraw Hill, 2004.

  2. Tremblay J.P and Sorenson P.G, *An introduction to data structures with applications*, Tata McGraw Hill, 2nd Edition.

  3. Gilberg, F Richard &   Forouzan, A Behrouz, *Data Structures A Pseudocode approach with C*, Thomson Brooks/Cole Publications,1998.

- ## OBJECTIVES:

  With a dynamic learn-by-doing focus, this document encourages students to explore data structures by implementing them, a process through which students discover how data structures work and how they can be applied. Providing a framework that offers feedback and support, this text challenges students to exercise their creativity in both programming and analysis. Each laboratory work creates an excellent hands-on learning opportunity for students. Students will be expected to write C-language programs, ranging from very short programs to more elaborate systems. Since one of the goals of this course is to teach how to write large, reliable programs. We will be emphasizing the development of clear, modular programs that are easy to read, debug, verify, analyze, and modify.

- ## PRE-REQUISITE:

  A good knowledge of c-language, use of Function and structures.
